***KJ Electric's Expanded Facility in Albany, NY Now Open***  
***18,000 Square Foot State of the Art Motor Repair & Distribution Center***

ALBANY, NY- Owner and CEO of KJ Electric, Ken Jacobs, is proud to announce that KJ Electric's new 18,000 square foot facility at 146 Railroad Ave in Albany, NY has now opened. The newly expanded and state of the art facility, includes both a repair and distribution center.

KJ Electric has doubled their size and the new building includes in stock inventory of motor, drives, controls and power transmission products, a motor repair facility and general office space. The state of the art repair shop has new equipment such as cranes, lathes, balancing stands, and much more allowing KJ Electric to provide motor repair and preventative maintenance to our Albany area customers.

"This new facility is a great opportunity for KJ Electric to better serve our customers in the capital region" said Ken Jacobs, "While our previous facility had served us for many years, we are excited to begin this next chapter at our new location".

In addition to expanding their facility and capabilities, KJ Electric is also hiring personnel for industrial sales, repair and field services in the Albany area.

In celebration of this newly opened facility, KJ Electric will be holding an Open House Event on May 8<sup>th</sup>, 2015. The event will feature product information and demonstrations, on-site service demonstrations and much more. More information about this event will be available soon.

Founded in 1981, by President and Owner Ken Jacobs, KJ Electric is a leading distributor of electric motors, drives, controls, and power transmission products. With capabilities of performing motor repair, on-site service, industrial control panel fabrication and servo & electronic board repair. KJ Electric has 5 locations in Albany, Binghamton, Buffalo, Rochester and Corporate Headquarters in Syracuse, NY.
